

MARINE LITTER IN THE ASEAN REGION AND PHILIPPINE RESPONSE AS A MEMBER STATE

Session 2.2: Enhancing Ways to Reducing Impact of Marine Debris in the East Asian Seas Region

OUTLINE

- I. State of the Problem
- II. Institutional
 Arrangement
- III. Initiatives and Programmes
- IV.Way Forward

State of the Problem

Top 10 Debris (2017 ICC Philippines)

1. FOOD WRAPPERS 939,063

6. PLASTIC BOTTLE CAPS **213,719**

2. CIGARETTE BUTTS 369,186

7. PLASTIC TAKEOUT/TAKE AWAY CONTAINERS 193,569

3. OTHER PLASTIC BAGS 294,030

8. PLASTIC BEVERAGE BOTTLES 154,849

4. STRAWS, STIRRERS **291,397**

9. PLASTIC CUPS, PLATES 119,594

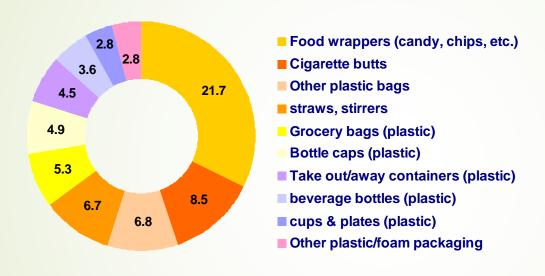

5. PLASTIC GROCERY BAGS 227,250

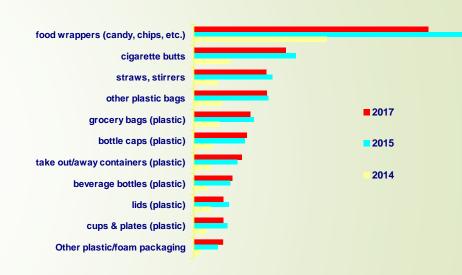

10. OTHER PLASTIC/ FOAM PACKAGING 118,841

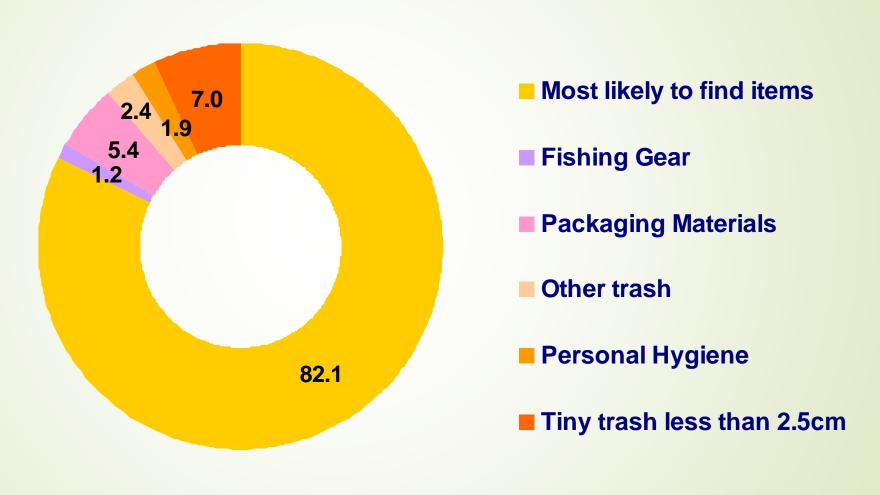

% of Top 10 Debris from Total Count

Total Top Ten (no.)	2,921,498 (67.6%)

Initiatives and Programmes

Monitoring and Research

Workshop on Collection and Identification of Microplastics along a strandline (April 2015)

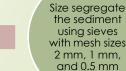

selected coastline / strandline

quadrats along

Preserve and transport to the laboratory for analysis Collect the sediments inside the assigned quadrat at > 5 cm depth

Return the excess / unclassified sediment at the sampling area

Initiatives and Programmes

Local Government Initiatives to address plastic pollution

Local Government Initiatives to address plastic pollution

- City or local ordinances banning the use of specific plastic products such as single use plastics bags, containers and straws
- Recycling plastic wastes into useful products such as recycling/transforming waste plastics into school chairs
- Incentivizing plastic segregation in schools by using points for surrendered recyclables and exchanging these with school supplies during school season and recreational materials during summer vacation
- "Decentivizing" by reprimanding households that does not practice waste segregation

Way Forward

Research

- Identification of marine plastic litter and microplastics hotspots
- Assessment and characterization of baseline occurrence of microplastics
- Advance the understanding of the distribution, sources, transport and impacts of plastic marine debris in general and micro-plastics in marine debris in particular through monitoring and research
- Development of a harmonized protocol for the collection and monitoring of marine litter

National Needs and Action Plans

- Development and implementation of a national action plan on marine litter and microplastics
- Technical and funding assistance in the development of a National Action Plan on Marine Litter and Microplastics
- Responsibility areas and coordination among stakeholders such as an extended producers responsibility
- Guidelines, standards, rules and regulations on marine litter intended for the different stakeholders such as standards for packaging design
- Establishment of physical infrastructure for the collection and treatment/disposal of marine litter
- Information and education campaigns (IEC)
- Sustained clean up activities
- Support to research activities

Legislations (on-going)

- 15th Congress Senate Bill No. 2759, Total Plastic Bag Ban Act of 2011;
- 17th Congress Senate Bill. 430, Plastic Bags Regulation Act; and
- House Bill 8120, Prohibiting the manufacture, sale, distribution and use of rinse-off cosmetics and clothing containing microplastics
