Blue economy initiatives

- **National Action Plan on Plastic Waste Management**

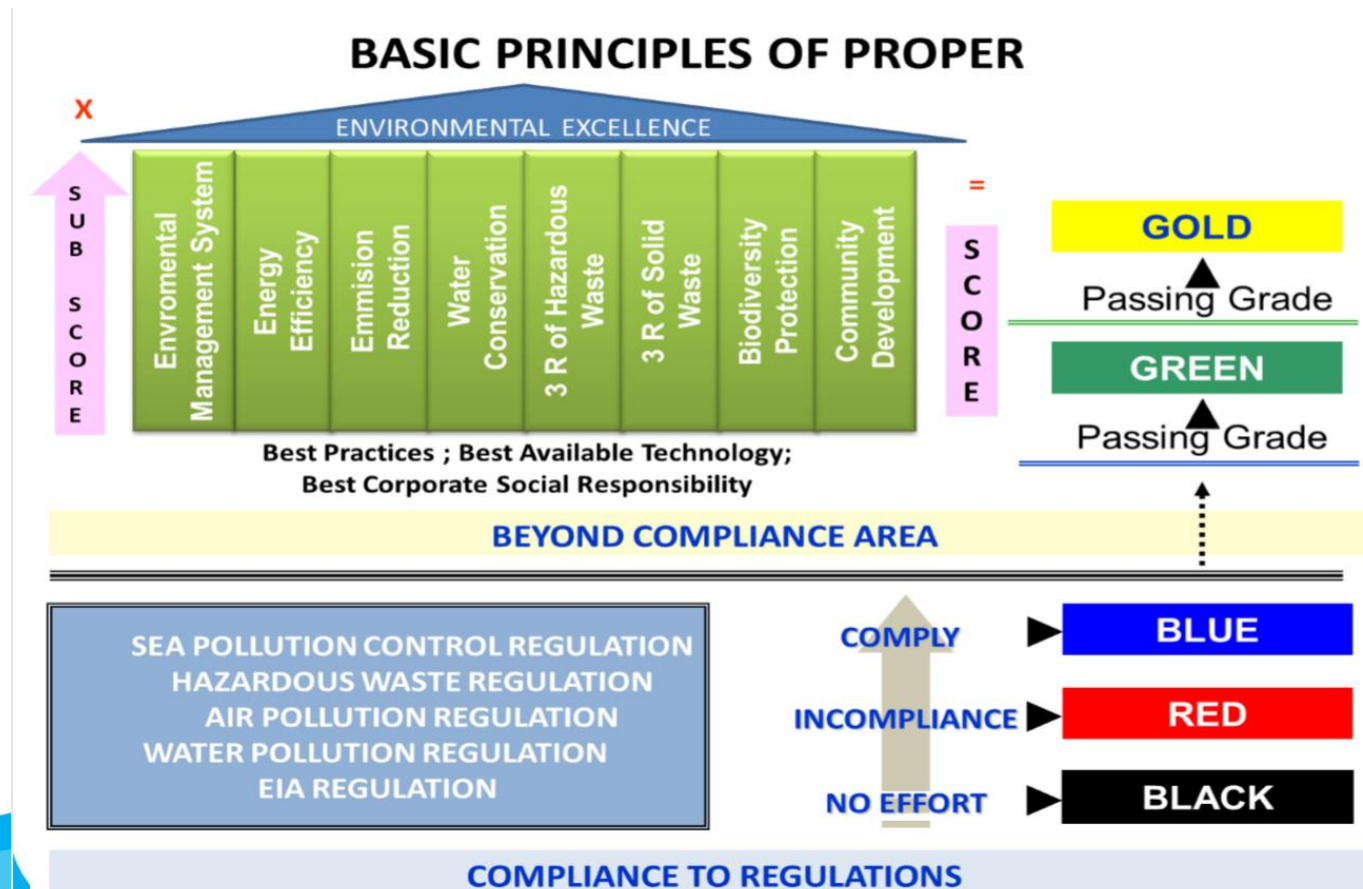

5 pillars

Improving behavior change
Reducing land-based discharges
Reducing sea-based discharges and leakage
Reducing plastic production and use
Enhancing financing mechanisms, policy reform and law enforcement

- **Coordination between institutions responsible for waste management.**
- **Application of technology to control plastic debris**
- **Public awareness to reduce, recycle and reuse plastic**

Blue economy initiatives

- **PROPER** is an industrial monitoring program that aims to encourage industry compliance with environmental regulations.

Blue economy initiatives

Minister of Environment and Forestry's Decree No. 180, Year 2014

Overall Result of PROPER 2013-2014

BLACK	:	21	Companies
RED	:	516	Companies
BLUE	:	1224	Companies
GREEN	:	121	Companies
GOLD	:	9	Companies

Blue economy initiatives

SDGs being achieved

of
SDG

Recommendations

Development of Marine Economy and Blue Economy Model as Accelerator for the Realization of Indonesia as an Independent Island Country, Advanced, Strong and Based on National Interest by Blue Development of Economics Sectors of:

- **Transportation**
- **Maritime Industry**
- **Fishery**
- **Tourism**
- **Energy and Mineral**
- **Marine Services**

Recommendations

- **Protect ocean health to support sustainable blue economy:**
 - Habitat restoration and protection; biodiversity conservation
 - Wastewater management
 - Solid waste management
 - Plastic marine debris management
 - Toxic waste management
 - Oil spill prevention and response
 - Ballast water management
 - Greenhouse gas emission reduction
